SUMMARY

Frontend Developer skilled in building responsive web applications using React, Next.js, Tailwind CSS, and Typescript. I enjoy turning abstract ideas into clean, functional interfaces and delivering real value to users. I learn quickly, thrive in collaborative environments, and take full ownership of my work – communicating clearly, staying organized, and working seamlessly across teams to bring ideas to life.

PROFESSIONAL EXPERIENCE

Freelance Frontend developer

Freelance - June 2023 - Present

- Developed a React-based cost estimation tool using Tailwind CSS that reduced manual cost estimation time by 60% for small construction companies.
- Delivered responsive web apps with clean, scalable code using React and Next.js, focusing on UX, accessibility, and mobile-first design.
- Turned client ideas into clear, easy-to-use interfaces, cutting revision rounds by half.
- Delivered complete MVPs directly to clients from scratch.
- Designed standardized project structures and reusable components to speed up development and simplify maintenance.
- Built a dynamic Next.js website with Sanity CMS integration, enabling full content management and seamless performance.
- Integrated third-party APIs and handled asynchronous logic using custom React hooks and Context API, improving app scalability and responsiveness
- Worked with backend technologies including Node.js, Express, and PostgreSQL, building REST APIs and integrating database operations.

TECHNICAL SKILLS

Languages & Markup: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Sequelize, REST APIs

Databases: Firebase, MongoDB, MySQL, PostgreSQL

Version Control: Git, GitHub

Tools: Figma, Vercel, Vite, Sanity CMS

Cloud: Azure (AZ-900)

PROJECTS

[QueTocaHoy](#) – Collaborative household management app (2025)

A web application that helps families and groups organize daily tasks, recipes, and shopping lists in one place.

- Developed a full-stack solution with React, Node.js, Express, and PostgreSQL.
- Implemented real-time synchronization using Socket.IO and Firebase integration for recipe storage.
- Enhanced user experience with Tailwind CSS and an interactive calendar for task scheduling.

[Building Price Estimator](#) – Web application for construction budget calculation (2025)

A tool designed for small construction businesses to automate pricing estimates.

- Streamlined the budgeting process using dynamic inputs for materials and labor.
- Implemented offline data persistence with IndexedDB.
- Enhanced UI/UX with Tailwind CSS and animation using Framer Motion.

EDUCATION

Bootcamp Full Stack Developer | *May 2025 – September 2025*
Fundación Esplai – Barcelona

Bachelor’s Degree in Civil Engineering | *September 2018 – February 2021*
Yuriy Fedkovych Chernivtsi National University – Chernivtsi, Ukraine

VOLUNTEER EXPERIENCE

Frontend developer
Kaleidoscope – 2024

- Improved user experience and engagement by redesigning key UI components and streamlining navigation across the platform. Ensured full responsiveness and seamless behaviour across all modern browsers.
