SUMMARY

Frontend Developer skilled in building responsive web applications using React, Next.js, Tailwind CSS, and Firebase. I enjoy turning abstract or incomplete ideas into clean, functional interfaces and takes pride in writing maintainable, well-structured code. Proactive, organized, and reliable — takes ownership of tasks, communicates clearly across teams, and focuses on delivering real value to users.

PROFESSIONAL EXPERIENCE

Freelance Frontend developer

Freelance - June 2024 - Present

- Built a React-based cost estimation tool using Tailwind CSS that reduced manual cost estimation time by 70% for small construction companies. [Building Price Estimator](#)
- Built and delivered 5+ responsive landing pages and business websites, enhancing UX and increasing client conversion rates through optimized layout and mobile design.
- Translated vague or non-technical client ideas into intuitive interfaces, reducing revision rounds by half.
- Delivered complete MVPs directly to clients, leading to 100% satisfaction and repeat projects.
- Created standardized project structures and reusable components, accelerating development time and maintainability.
- Maintained version control and structured codebase using Git and GitHub, ensuring smooth updates and clean collaboration.
- Integrated third-party APIs and handled asynchronous logic using custom React hooks and Context API, improving app scalability and responsiveness

TECHNICAL SKILLS

Languages & Markup: JavaScript, TypeScript, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, RESTful APIs
Databases: PostgreSQL, Firestore (NoSQL), MongoDB, MySQL

Version Control: Git, GitHub
Tools: VS Code, Postman, Firebase, Vercel, Vite
Testing: Jest, React Testing Library

PROJECTS

[Building Price Estimator](#) — Web application for construction budget calculation (2025)

A tool designed for small construction businesses to automate pricing estimates.

- Streamlined the budgeting process using dynamic inputs for materials and labor.
- Implemented offline data persistence with IndexedDB.
- Enhanced UI/UX with Tailwind CSS and animation using Framer Motion.

[Recipe Compass](#) — Recipe management web app with Firebase (2024)

A platform to publish, edit, and save personal recipes.

- Built full CRUD functionality with secure authentication using Firebase.
- Integrated image loading from Unsplash API with lazy loading for performance.
- Added custom filters and UX improvements to create a smooth user experience.

EDUCATION

Bootcamp Full Stack Developer | May 2025 - September 2025
Fundación Esplai - Barcelona (in Progress)

Bachelor's Degree in Civil Engineering | September 2018 - February 2021
Yuriy Fedkovych Chernivtsi National University - Chernivtsi, Ukraine

VOLUNTEER EXPERIENCE

Frontend developer

Kaleidoscope - 2024

- Improved user experience and engagement by redesigning key UI components and streamlining navigation across the platform and ensured 100% cross-browser compatibility and responsiveness.
