Professional Summary

Passionate and detail-oriented frontend developer with hands-on experience using JavaScript, TypeScript, React and Next.js. Experienced in building responsive, performant applications. Focused on clean UI, accessibility, and performance. Eager to contribute to innovative projects, leveraging knowledge in frontend technologies, tools, and collaborative development processes.

Skills

Programming languages: JavaScript, TypeScript

Libraries/Frameworks: React, Redux, NextJS

Tools: Git/GitHub, Firebase, TailwindCSS, Figma

Languages: English, Spanish, Ukrainian, Russian

Experience

Freelance Frontend developer

Jun 2024 – Present

- Delivered 5+ responsive landing pages and business websites, improving client conversion rates by up to 30% by optimizing structure, UX, and mobile layout.
- Transformed client requests into clear, user-friendly interfaces, helping reduce misunderstandings and the number of revision rounds by 50%.
- Collaborated directly with non-technical clients to turn vague ideas into working MVPs, achieving 100% satisfaction and repeat work from 3 clients.
- Standardized project structure and reusable components across freelance projects, reducing development time on new builds by 40% and improving maintainability.

Projects

Building Price Estimator – Construction Cost Calculator Web App | 2025

- Automated manual quoting process for small construction firms, reducing estimate preparation time from 1 hour to under 10 minutes.
- Improved order accuracy by 45% by integrating dynamic material and labor inputs with real-time cost calculations.
- Enabled seamless offline-first usage with IndexedDB and enhanced UI with Tailwind CSS and Framer Motion, increasing completion rate of quote submissions by 40%.

Recipe Compass – Recipe Management App | 2024

- Enabled full CRUD functionality using Firebase, including secure authentication and real-time updates.
- Reduced image loading time by 50% by optimizing Unsplash API calls with lazy loading.
- Boosted user retention by 35% by integrating personalized recipe filtering and improved UX.

Buidl & Borrow | 2024

- Collaborated in a cross-functional team of 4 to build a decentralized lending platform during a blockchain hackathon.
- Led frontend development using React, Tailwind CSS, and Radix Wallet integration, enabling users to borrow/lend tokens with real-time feedback.

Volunteer Experience

Kaleidoscope | 2024

- Improved user experience and engagement by redesigning key UI components and streamlining navigation across the platform and ensured 100% cross-browser compatibility and responsiveness.
