SUMMARY

Software Engineer with commercial experience building production web applications and customer-facing features using React and TypeScript. Worked across authentication, billing, API integrations, design systems, testing, analytics, and production monitoring within an international product team. Experienced with React, TypeScript, Node.js, REST APIs, PostgreSQL, and modern frontend architecture.

PROFESSIONAL EXPERIENCE

Software Engineer

Multiverse Computing - January 2026 - July 2026

- Built and shipped customer-facing features including authentication, billing, usage tracking, API key management, and team management using React, TypeScript, Vite, MUI, and TanStack Query.
- Integrated frontend features with REST APIs and handled loading, error, and interaction states across product flows.
- Developed reusable design system components used across product areas.
- Added frontend tests with Vitest and React Testing Library and resolved UI issues from QA and code reviews.
- Collaborated with product, design, and backend engineers through GitLab merge requests and code reviews.
- Instrumented key user flows with PostHog analytics and supported production monitoring with Sentry.

Full Stack Developer

Freelance - June 2023 - January 2026

- Built and delivered web applications and MVPs using React, Next.js, TypeScript, Node.js, and Express.
- Developed dashboards, scheduling interfaces, authentication flows, forms, and REST API integrations.
- Built backend functionality with Node.js, Express, PostgreSQL, MySQL, Sequelize, JWT, and Firebase.
- Delivered projects from application setup and database integration through frontend development and deployment.
- Built reusable frontend architecture with custom hooks, state management, and third-party integrations.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript	Testing: Vitest, Jest, React Testing Library
Frontend: React, Next.js, MUI, Tailwind CSS, TanStack Query	Monitoring: PostHog, Sentry
Backend: Node.js, Express.js, REST APIs, JWT	Tools: Git, GitLab, GitHub, Vite, Postman, Figma
Databases: PostgreSQL, MySQL, Firebase, MongoDB	Certification: Azure Fundamentals (AZ-900)

PROJECTS

[QueTocaHoy](#) - Collaborative Household Management App | 2025

Full-stack application for managing household tasks, recipes, and shopping lists.

- Built React interfaces for task, recipe, and household management flows.
- Developed REST APIs with Node.js, Express, PostgreSQL, Sequelize, and JWT authentication.
- Added real-time updates with Socket.IO and deployed the application using Vercel, Render, and Neon.

[P.Slate](#) - University Schedule Planner | 2025 - Present

- Frontend application for building and comparing university schedules.
- Built course search, section selection, conflict detection, schedule generation, and weekly timetable views.
- Implemented English/Arabic localization with full RTL layout support.
- Built with React, TypeScript, Vite, Tailwind CSS, Zustand, i18next, and React Router.

EDUCATION

Bootcamp Full Stack Developer | May 2025 - September 2025

Fundación Esplai - Barcelona

Bachelor's Degree in Civil Engineering | September 2018 - February 2021

Yuriy Fedkovych Chernivtsi National University - Chernivtsi, Ukraine

ADDITIONAL COURSES

Relational Database | 2026

freeCodeCamp

React - The Complete Guide | 2025

Udemy

VOLUNTEER EXPERIENCE

Frontend developer

Kaleidoscope - 2024

- Redesigned key UI components and navigation flows to improve usability and interface consistency.
